

Who is Geray Xin

Beijing Geray Xin Virescence Ltd is a Joint Venture enterprise between Erosion Solutions Australia Pty Ltd and Beijing Geray Xin. Based in Beijing, China, Beijing Geray Xin Virescence Ltd builds, operates and sells purpose-built truck and all-terrain vehicle mounted hydraulic seeding machines and straw mulchers. The main services of the company are erosion control, grass aqeseeding, revegetation and unit sales. Our speciality is erosion control in steep, high areas that are difficult to access.

Beijing Geray Xin Virescence Ltd operates these services throughout China and South-East Asia and exports units for sale worldwide. The collective experience of the founding partners of Beijing Geray Xin Virescence Ltd is extensive.

The Vice Chairman, **Mr Bill Leggett**, is also the Director of Aqeseeding Services Pty Ltd (based in Australia and servicing South-East Asia) which is principally involved in revegetation, spray seeding and erosion control. Mr Leggett provides technical support on aqeseeding projects. He has over 20 years experience in the industry and prominent affiliations with the International Erosion Control Association.

Chairman, **Mr Richard Murphy** and Technical Director, **Mr Sean Murphy** together have over 40 years experience in the turf industry. As Directors of TurfGrass Adelaide, they operate one of the largest turf farms in Australia and are also import agents for several brands of turf equipment. Mr Richard Murphy is a former board member of Turf Producers International and the founding Chairman of Turf Producers Australia.

Mr Zhou Shu Hua, Deputy Chairman and General Manager in Beijing, has over 15 years engineering and managerial experience. Mr Ron Greer, Export Sales Director has many years experience both in his own company, Millenium, which imports a range of automotive spare parts from Japan, and as a senior technician (Diplome of Agricultural Technologies) with the Department of Agriculture in Western Australia.

Beijing Geray Xin Virescence Ltd is geared to become a leading company in the field of environmental revegetation and erosion control. Our methods of operation are continually upgraded to incorporate leading-edge technical improvements to ensure increased reliability, performance and customer satisfaction.
