

The Aquaseeding Company pioneered the technique of metered Hydromulch application of bentgrass seed on to greens, resulting in a more even distribution of seed at a much lower sowing rate, which in turn, made the emerging plants less prone to disease. This technique has now become an Industry Standard in our area.

澳大利亚溶液喷播有限公司 (Aquaseeding Pty Ltd) 开创了在球场使用剪股颖计量覆盖播种法,这可以在使草种更加均匀的分布生长同时使用极低的播种用草量,从长期的角度上来讲,也就是草皮生病的几率就会大大减少。现在这项技术在我们的地区已经成为一个产业的标准了。
